ARYA offers a wide range of services including Oil-Gas, Business Process Outsourcing, offshore software development, application development Web development and product lifecycle management. By combining the domain expertise with the low cost offshore software development, our Offshore Delivery Model guarantees enhanced productivity, a cost savings of up to 45%, and faster time to market.

Our three dimensional service structure delivers end-to-end solutions in a variety of industries, technologies and service practices - maximizing the value delivered for our customers through a diversified, adaptable and synergetic business and service model.

Our Services :

Oil & Gas

ARYA is an experienced engineering firm offering expertise in projects like processing and transmission of natural gas, natural gas liquids, conventional Crude oil, heavy oil, bitumen, and other petroleum products.

ARYA executes it's engineering design and project management to a timely and successful completion.

Off-Shore

ARYA is one of the leading providers of Business Process Outsourcing (BPO) services, offering a wide range of back office, customer care & support and telemarketing outsourcing solutions to clients worldwide. Several leading telecom, banking, insurance and travel companies have out-sourced their customer interaction and key business processes.

IT Services

At **ARYA**, we use technology to create powerful solutions that are focused on such critical areas as enhancing customer relations, optimize operations and increasing revenue opportunities. We provide services in developing, testing, integrating, delivering, supporting and maintaining innovative software applications that deliver tangible business advantage.

ARYA translates the product vision and technology leadership into functionality and features that bring value to end customers. Our Offshore software development services are best put to use when an organization is facing a large project but of short duration as it can limit the number of new employees and administrative support personnel you must take on.

At **ARYA**, we are caretakers of the client's intellectual property, proprietary software and new development specifications. Clients retain full ownership of all intellectual property rights and software source code

at the end of any project. We are your offshore development partners and are fully focused in getting your project done **Quickly, Efficiently and Effectively.**

Why ARYA as a OUTSOURCING Partner :

- **Respond promptly and flexibly to any changes or additions during the course of project.**
- **Sincere Dedication of programmers to meet deadline**
- **Approach to building long term relationship for offshore software development services**
- **Commitment to client benefit maximization**
- **A low risk delivery model and therefore highly predictable systems**
- **Reduce development cost by more than 50%**

At **ARYA**, we are clear that e-business is first and foremost about business innovation. We believe that digital strategies deliver when business acumen and technology converge. This is why our e-business focus addresses the entire gamut of business requirements - from establishing a meaningful Internet presence and content.

The Company integrates its products and services to create customized solutions to allow you to undertake technology-based business transformation that allows reorganization in line with today's dynamic digital business environment.

The Company's Global Delivery Model provides for the best resources to be drawn from its vast talent pool across the globe to offer optimal solutions.

As the IT environment is constantly changing, this has enabled us to work closely with our customers and partners to quickly adapt to the needs and challenges facing our clients. By providing feed- back channeled directly to our development team we are able to meet these demands head-on delivering an immediate return on investment through a no fuss, no nonsense, and personal service!!!!

Technologies:

Java

j2EE

java script

PHP

.Net

Visual Basic

joomla

Oracle

mySql

ms-sql

DB2

HTML/XHTML/XML

LAMP / WAMP

Drupal

AJAX

Multi Tier Framework

Web 2.0

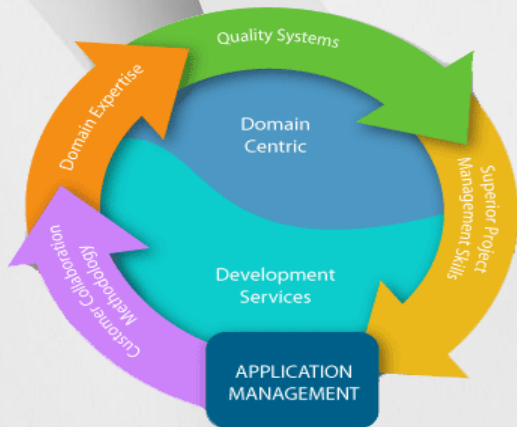

Apache Web Server

Windows Web Server

Flash animation

...& many other Leading Technologies.

Application Management:

Business applications are increasingly relied upon to help organizations run more effectively. Such reliance also brings risk. As your business grows, your applications environment becomes more complex, costly and difficult to manage. Should an application fail, it could detrimentally impact your business. You need proven expertise to help you unlock the true strategic value of your applications for global competitiveness.

That's where **ARYA** can help. We provide services in developing, testing, integrating, delivering, supporting and maintaining innovative software applications that deliver tangible business advantage.

Application Development :

Custom Application Development

Custom Application development outsourcing helps organizations adapt to the rapid technology advancements and evolving business processes and fulfill their need for newer customized solutions with embedded business processes, rules and logic.

- New features implementation
- Configuration Management
- Troubleshooting and bug fixing
- Performance management
- Change implementation, code review and testing

Web Application Development

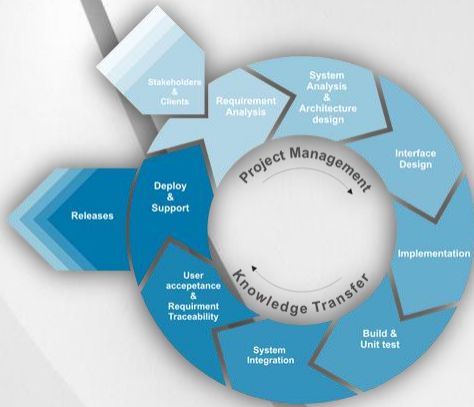

Application development has undergone a transition over the last few years, with the migration of applications from traditional client/server designs to the Internet. This dynamic nature of the web as a convenient transaction vehicle for business transactions has made fast-paced development of solutions – paramount. The advent of technologies such as ASP & Microsoft .NET, PHP Development, Java/J2EE, Cold Fusion etc allows us to convert business processes and legacy application into web enable applications.

Desktop Application

Desktop Applications are robust, rich-client applications that are compiled and run using the processing power of an individual user's desktop computer. ARYA has expertise in a wide variety of the latest programming language tools and platforms for client-server application. Structured methodologies and proven IT processes helps to reduce complexity, risks and costs associated with client/server development. We help you develop customized software applications and assist you thorough out the entire software development Life Cycle – including project management, systems analysis and design, software development, implementation and training.

Application & Web Development Life Cycle :

Mergers. Acquisitions. Expansion. Changing market conditions. A simple advance in technology or change in customer preferences. When you come down to it, any number of factors can render your current applications unsuitable for the business challenges you face. When that happens, you need more than an application development partner who understands the technology issues at hand.

You need a partner who can ensure success with an approach that gives you the best possible balance of cost, speed and quality.

Advantages with ARYA :

- Reductions in overall information technology (IT) spend over the lifetime of your application
- An exceptional record for on-time and on-budget delivery
- Flexible & Customized processes proven to boost development productivity
- Outsourcing capabilities that help you lower costs, access the skills you need and expedite time to market
- Global reach with presence in two continents
- Elaborated working hours due to presence in different time zones
- Experienced resources and technical support
- Quality being the prime focus
- On-Time delivery
- Customer satisfaction

ARYA's Website/Web Development Solution :

“Your website is your investment with definite objectives, and if scooped-out and implemented correctly, it translates into measurable results for your organization.”

The net can help your business to prepare for tomorrow's competitive business environment in many ways. It can:

- Facilitate new business by making information about your product and services readily available to potential customers across the globe.
- Provide better services to your existing customers by giving them convenient channels for communication and transactions.
- Help your employees clinch a deal, solve a problem or soothe a disgruntled customer by giving them secure access to relevant information wherever they may be.
- Improve your bottom line by bringing efficiencies into your procurement processes.

The entire Software/Web/Application development cycle includes:

➤ **Analysis and need of solution:**

The web development process begins with this phase. At this point of initiation a detailed study is carried out as to what is the actual requirement of the customer and how it can be accomplished.

➤ **Planning and designing:**

- ❖ **What to do:** This section includes the conceptualization of design and what all technologies are to be undertaken.
- ❖ **When to do:** At this stage of planning the entire process of website making is classified with respect to time period.
- ❖ **How to do:** In this phase of designing the techniques of what all features are to be included and what all techniques are to be utilized for same are finalized.

➤ **Implementation:**

Once done with the planning and designing of the solution to be proposed, comes the actual implementation of the process. In this after a design has been finalized comes the process of programming. At this level features like Login and Shopping cart are inculcated.

➤ **Testing:**

After completing the process of designing and implementation comes the testing phase. In this the product is tested for its error free working and efficiency.

➤ **Maintenance and Post implementation:**

The process of web development/Software Development/Application development comes to an end at the stage of maintenance and post implementation. In this the aftermath is taken care of.

ARYA's BPO Solution:

ARYA is one of the leading providers of Business Process Outsourcing (BPO) services, offering a wide range of back office, customer care & support and telemarketing outsourcing solutions to clients worldwide. Aided by world-class infrastructure, business competencies, domain knowledge & expertise and a dedicated group of highly skilled and trained professionals, we are able to provide the best quality outsourcing services to clients.

Why ARYA?

- Qualitative focus
- Clean, clear and customized to your needs
- Simple and easy to use for the customer
- Quick turnaround time
- Lower costs

Having bases in two continents, we have the advantages of being able to understand the customers' expectation and needs in different regions/ cultural environments.

Quality being the prime focus

We focus on open source technologies due to their flexibility and cost- effectiveness. The cost benefits are passed on to the customers. Our solutions pass through various levels of quality analysis and testing phases. We support the customer in its decision making process and also help in visualizing and analyzing the current and/or future trends in the industry, thus helping in coming out with better solutions that a closer fit to the requirements.

We have worked with companies/ individuals/ small entrepreneurs and helped them automate their processes resulting in saving time and money and the net result being increased revenues and profits.

Being into other verticals as well (apart from IT), it becomes easier for us to understand the pulse and needs of the customer. Our support team is just a call away to help you in any new / ongoing issues related to the software implementation.

At **ARYA** we consistently focus towards meeting these objectives by ensuring that they reflect the current realities of the connected world. We showcase your marketplace identity that cultivates powerful relationships.

Crossing over the geographical boundaries, we can work on the website design, website development, web marketing, ecommerce solutions and software development for organizations based in any location in India or even for the clients based in global destinations of USA, UK, Australia and so on. We have the expertise and technology to serve anyone based anywhere in the world.

- **Website Designing and Development services**
- **Custom Web Solutions**
- **Online Orders and E-commerce**
- **Search engine Optimization services**
- **Client-Server Applications**
- **Customized Desktop Applications**
- **Enterprise Content Management System**
